Welcome to the Certificate Import Wizard

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.

A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.

Security Warning

You are about to install a certificate from a certification authority (CA) claiming to represent:

ISTANBUL UNIVERSITY ROOT CA

Windows cannot validate that the certificate is actually from "ISTANBUL UNIVERSITY ROOT CA". You should confirm its origin by contacting "ISTANBUL UNIVERSITY ROOT CA". The following number will assist you in this process:

Thumbprint (SHA1): 27296EB2 98966E420D2439CD2 00796692 BC749B09

Warning:
If you install this root certificate, Windows will automatically trust any certificate issued by this CA. Installing a certificate with an unconfirmed thumbprint is a security risk. If you click "Yes" you acknowledge this risk.

Do you want to install this certificate?
