

MICROMEDEX[®] SOLUTIONS

Truven Health Analytics delivers the most complete information solution to ensure consistency in medication safety, health and disease management, toxicology information, and patient education. Available via Micromedex 2.0 and mobileMicromedex[®] 2.0.

Medication Safety Solutions

- DRUGDEX[®]**
Comprehensive drug resource with fully referenced, unbiased content covering dosage, pharmacokinetics, cautions, interactions, comparative efficacy, labeled and off-label indications, and clinical applications. Spans international, FDA-approved, and nonprescription preparations.
- DRUG-REAX[®]**
Screens and identifies drug-drug, drug-food, drug-disease, drug-ethanol, and drug-laboratory interactions, along with previous allergic reactions. Now includes important drug-herbal interactions and pregnancy and breast-feeding warnings.
- DrugPoints[®]**
Quickly access critical drug information presented in brief bullet points at the point of need. Pinpoints essential data such as class, administration, indications, contraindications, interactions, and adverse effects. Links to DRUGDEX monographs for more detailed information.
- IV INDEX[®] WITH TRISSEL'S[™] 2**
Helps clinicians pinpoint potentially dangerous intravenous combinations. Features parenteral compatibility information from Trissel's 2, a database authored by Lawrence Trissel, MS, FASHP. Identifies factors that may contribute to conflicting compatibility results.
- P&T QUIK[®] REPORTS**
A series of summary reports on drugs under consideration for inclusion in hospital formularies to help facilitate formulary development. Reports are organized in standard format to save valuable time when preparing presentations for P&T committees.
- PDR[®]**
Enables informed decisions with FDA-approved labeling for 2,800+ prescription drugs. Complete electronic databases for PDR, PDR[®] for Nonprescription Drugs and Dietary Supplements, and PDR[®] for Ophthalmic Medicines.

Available via InfoButton Access[®]

- MARTINDALE: THE COMPLETE DRUG REFERENCE**
From the Royal Pharmaceutical Society of Great Britain
Delivers concise, authoritative information and unique international coverage of drugs in clinical use, investigational and herbal drugs, diagnostic agents, pesticides, coloring agents, preservatives, and noxious substances.
- INDEX NOMINUM**
Edited by the Swiss Pharmaceutical Society
Synonyms, chemical structures, manufacturer information, and therapeutic classes for 5,300+ international drugs, drug derivatives, and close to 42,000 international trademarks.
- KINETIDEX[®]**
Provides an accurate, interactive tool to help optimise dosing for each patient and maintain individual records for future reference. Using Bayesian mathematics, KINETIDEX quickly and automatically calculates pharmacokinetic parameters to deliver patient-specific dosing recommendations for vancomycin, aminoglycosides, theophylline, digoxin, and valproic acid. CD-ROM only.
- NATIONAL DRUG FILES - UK**
The new UK Drug File provides the eMC's Summary of Product Characteristics and information about medicines licensed for use in the UK, side-by-side with the comprehensive evidence of Micromedex. Search on generic or trade name to view UK approved dose, use, possible side effects, MHRA-approved indications, and more.
- NATIONAL DRUG FILES - ITALY**
The new Italian Drug File delivers MINSAN codes and AIFA prescribing criteria, in the familiar, consistent Micromedex format. Search on generic or trade name to find ATC codes; AIFA approved indications and limitations; form, strength, route of administration and packaging; reimbursement class; price, prescribing criteria and authorized prescriber; off-patent drugs.
- DRUG IDENTIFICATION TOOL/IDENTIDEX[®]**
Helps quickly identify unknown tablets or capsules. Search through 74,000+ indexed terms by manufacturer's imprint code and physical characteristics such as size, color, and shape. Includes 4,500+ drug-related slang terms. Images available for many drugs.

- RED BOOK ONLINE[®]**
RED BOOK Online[®] is a new and convenient Web-based format of the same drug pricing and product information found in RED BOOK for Windows and ReadyPrice CDs, as well as the trusted RED BOOK print reference. Includes easy search functionality, daily content updates, and customized results. Search by product name, active ingredient, NDC/HRI/UPC, or manufacturer name. Narrow results by active or deactivated drugs and find additional information about products including extensive AWP price history.
- AltMedDex[®]**
Comprehensive, evidence-based monographs on herbals, dietary supplements, vitamins, and minerals. Provides clinically focused information on uses, dosing, efficacy, adverse reactions, and interactions.
- AltMedDex[®] PROTOCOLS**
Advice for healthcare professionals on integrating complementary and alternative medical therapies into treatment of common health conditions.
- AltMedDex POINTS[®]**
Instant access to critical herbal and dietary supplement information. Pinpoints essential data such as dosage, administration, indications, contraindications, interactions, and adverse effects. Links to AltMedDex evaluations for more detailed information.
- HERBAL MEDICINES: A GUIDE FOR HEALTHCARE PROFESSIONALS**
From the Royal Pharmaceutical Society of Great Britain
International coverage of herbs and their application in complementary and alternative medical therapies.
- NeoFax[®]**
Complete neonatal drug information, covering more than 180 substances to help accurately prescribe, calculate, formulate, and administer essential drugs and parenteral nutrition solutions for infants.

Health and Disease Management Solutions

- DISEASEDEX® GENERAL MEDICINE**  Designed to support disease management and treatment decisions, DISEASEDEX enables clinicians to quickly reference the most current treatment-of-choice information to help minimise errors, prevent unnecessary tests or procedures, reduce treatment costs, and improve patient outcomes.
- ClinicalPoints®**  Instant access to the most critical emergency and acute care information. Pinpoints essential data including treatment, diagnosis, and key points.

- DISEASEDEX® EMERGENCY MEDICINE**  Provides detailed information on clinical presentation, laboratory and radiological data, pharmacologic and non-pharmacologic therapeutics, and appropriate patient disposition. Assists in the rapid, effective diagnosis and treatment of patients in emergency care settings.

- Lab Advisor®**  Gets right to the point with the knowledge clinicians need to order and interpret test results. Also helps clinicians research and select cost-effective tests when a multitude of appropriate testing options are available.

Toxicology Solutions

- POISINDEX®** Identifies and provides ingredient information for hundreds of thousands of commercial, pharmaceutical, and biological substances. Provides 1,000+ detailed management/treatment protocols discussing clinical effects, treatment, range of toxicity, and more.

- TOMES®** Rapid, easy access to medical and hazard information needed for the safe management of chemicals in the workplace, evaluating quick response to emergency situations, and regulatory compliance.

- PHARMACEUTICAL MSDS** More than 1,000 USP material safety data sheets (MSDS) for drugs and chemicals.

- REPRORISK®** Most comprehensive compilation of reproductive risk information databases available.

- ToxPoints®** Instant access to the most critical toxicology information needed. Pinpoints essential data including clinical effects, treatment, and range of toxicity.

Patient Education Solutions

- CareNotes®** Assists in educating patients about their immediate condition, laboratory tests, treatment, follow-up care, and ongoing health concerns. Offers a full range of information including general, pre-admission, inpatient, discharge, and continuing care. Includes concise overviews of the most frequently prescribed drugs and 3-D color images. Administrator's tool allows customization of documents. *Also available in Spanish.*

- CONSUMER HEALTH SOLUTION** Patient-focused information to help patients and their families make informed health and treatment decisions. Customisable modules include interactive assessments, drug and lab test information, multimedia presentations of medical procedures, animations, advice on how to live with common conditions, and tools designed to help patients work with their caregivers. Spanish language and multiple literacy levels available.

- DETAILED DRUG INFORMATION FOR THE CONSUMER™** Provides drug information in patient-friendly language. Includes route-specific information, importance of diet, uses for this medicine, and "black box" warning sections.

- AltCareDex®** Information for patients on herbals, dietary supplements, vitamins, and alternative therapies for various health conditions.

- AltMed-REAX™ FOR THE PATIENT** Patient education materials on interactions between alternative medicines and drugs, food, alcohol, and tobacco.

Integrated Solutions

- InfoButton ACCESS®**  One-click patient and context-specific information to support clinical decisions. InfoButton Access gives clinicians instant information relevant to the situation at hand. And they get it without any training — all they have to do is click on the blue "i" button. Clinicians can look up treatment recommendations, confirm a dose, or even change the course of treatment — all directly within their EMR or CPOE system.

- UltiMedex®** The UltiMedex suite combines decision-support intelligence with the most trusted clinical content available to reduce medication errors and enhance patient care. UltiMedex can be integrated into most platforms via flat files or CKO servers, providing unified interaction checking, dosing, and alerting consistently within CPOE systems and across the clinical workflow. The suite consists of RED BOOK™, Medication Advisory Screening, Patient Specific Dosing, IV Screening, Image and Imprint Database, and other key databases.

- FORMULARY ADVISOR®** This user-friendly online formulary management tool allows real-time formulary updates and communication. Users have immediate access to current formulary and drug information throughout an entire facility via both desktop and mobile devices.
- INTEGRATED WORKFLOW TOOLS** The Clinical Xpert™ suite provides clinical workflow solutions for real-time Web and mobile clinical patient data access, clinical surveillance, care team communication, and electronic medication reconciliation.

ABOUT TRUVEN HEALTH ANALYTICS

Truven Health Analytics delivers unbiased information, analytic tools, benchmarks, and services to the healthcare industry. Hospitals, government agencies, employers, health plans, clinicians, and life sciences companies have relied on us for more than 30 years. We combine our deep clinical, financial, and healthcare management expertise with innovative technology platforms and information assets to make healthcare better by collaborating with our customers to uncover and realize opportunities for improving quality, efficiency, and outcomes. With more than 2,000 employees, we have major offices in Ann Arbor, Michigan; Chicago; and Denver.
